

Fachbereich 14

Biochemie, Chemie, Pharmazie

Seminar Series

Current Highlights in

Biological and Medicinal Chemistry

Summer Term 2010

Tuesdays, 17:00, Biocenter, Seminar Room N100, 0.15

May, 04	Dieter Steinhilber	<i>Inhibition of arachidonic acid metabolizing enzymes with small molecules</i>
May, 11	Eugen Proschak	<i>In silico design of selective kinase inhibitors</i>
May, 18	Jochen Klein	<i>Lipid signaling – focus on phospholipase D</i>
May, 25	Robert Tampé	<i>Present your self or die - how viruses escape immune surveillance</i>
June, 01	Alexander Heckel	<i>Let there be light - a journey to the land of light-responsive molecules</i>
June, 08	Harald Schwalbe	<i>Small molecule induced cell differentiation</i>
June, 15	Manfred Schubert-Zsilavecz	<i>Medicinal Chemistry of Nuclear Receptor Ligands</i>
June, 22	Holger Stark	<i>Current Highlights in Histamine H3 Receptor Antagonists</i>
June, 29	Beatrix Süß	<i>RNA-based conditional gene expression</i>

ALL WELCOME !!!
