

Seminar „Current highlights in Chemical Biology and Medicinal Chemistry“

Summer Term 2008

Time: **17.00** at Campus Riedberg, Biocenter, Seminar room N100, 0.15

Date	Speaker	Title
April 22	Alexander Heckel	<i>Let there be light - a journey to the land of light-responsive molecules</i>
April 29	Dieter Steinhilber	<i>Inhibition of arachidonic acid metabolizing enzymes with small molecules</i>
May 06	Joachim Engels	<i>Therapeutic oligonucleotides for antiviral therapy</i>
May 13	Harald Schwalbe	<i>Small molecule induced cell differentiation</i>
May 20	Beatrix Süß	<i>RNA-based conditional gene expression</i>
May 27	Robert Tampé	<i>“Self” or die – how viruses escape immune surveillance</i>
June 03	Jochen Klein	<i>Lipid signaling – focus on phospholipase D</i>
June 10	Manfred Schubert-Zsilavec	<i>Selective PPAR modulators, dual and pan PPAR agonists: multimodal drugs for the treatment of Type 2 diabetes and atherosclerosis</i>
June 17	Gisbert Schneider	<i>De novo design of hit and lead candidates</i>
July 01	Holger Stark	<i>Current Highlights in Histamine H₃ Receptor Antagonists</i>
